PROFILE

Inventive and systems driven Information Technology student at Grand Valley State University focused on building efficient, intelligent solutions.

My background combines networking, cybersecurity, programming, and data analytics with a strong understanding of business operations. I am especially interested in automation and artificial intelligence, where software can reduce friction and increase clarity inside organizations.

My long term goal is to launch a technology company that develops advanced AI agent software designed to streamline operations. I aim to build intelligent systems that integrate data, automate decision flows, and improve how businesses operate through adaptive automation and real time analysis.

EDUCATION

Grand Valley State University

Allendale, MI

B.S. in Information Technology (IT)

Expected April 2027

General Computing – Gained experience in computer components, operating systems, control structures, problem analysis, and algorithm design. Applied these concepts through programming assignments and system builds.

Hardware & Software – Learned the theory and practical aspects of hardware components and system architecture. Installed, configured, and troubleshooted hardware and software in business and networked environments. Familiar with both consumer and enterprise systems.

Network Systems – Studied network design, implementation, and administration with a focus on local area networks (LANs), routers, switches, IP addressing, and system configuration. Completed hands-on labs simulating enterprise environments.

Data Analysis & Problem Solving – Collected, cleaned, and analyzed large datasets using Excel and Python. Applied critical thinking and statistical tools to draw insights and solve complex data-driven problems.

Cybersecurity – Covered topics in security threats, defense strategies, privacy concerns, and ethical considerations. Learned risk assessment and security planning for both individuals and organizations.

Internet Media – Worked with multimedia content such as graphics, video, audio, and XML. Explored emerging web technologies and how to implement them in modern digital environments.

General Business – Took foundational courses in Economics, Accounting, Business Law, and Management Information Systems (MIS), connecting IT solutions with business strategy and operations.

WORK EXPERIENCE

DJ KRL

Grand Rapids, MI

Freelance DJ

December 2025– Current 2026

- Freelance DJ for bars and venues in Grand Rapids, earning repeat bookings
- Communicate directly with venue owners and managers to coordinate events and expectations
- Promote sets on social media to support turnout and build a local brand
